

What reaches you, and what you sign

Purchase and biomedical walk the path day to day. Four things come to you, and one of them needs your hand. The rest you read when you want to.

WHAT LANDS ON YOUR HOME

- **A recommended quote.** Purchase or biomedical marked one quote Recommended with a line of why. Above ₹ 5 lakh only you can close on it. One button: Confirm and close on it.
- **A device a doctor of yours sent to the desk,** with what they checked about it on Canipus.
- **A letter to the register waiting for an address,** when Canipus could not find where to write.
- **A date due on a machine you own:** warranty, AMC or calibration within thirty days.

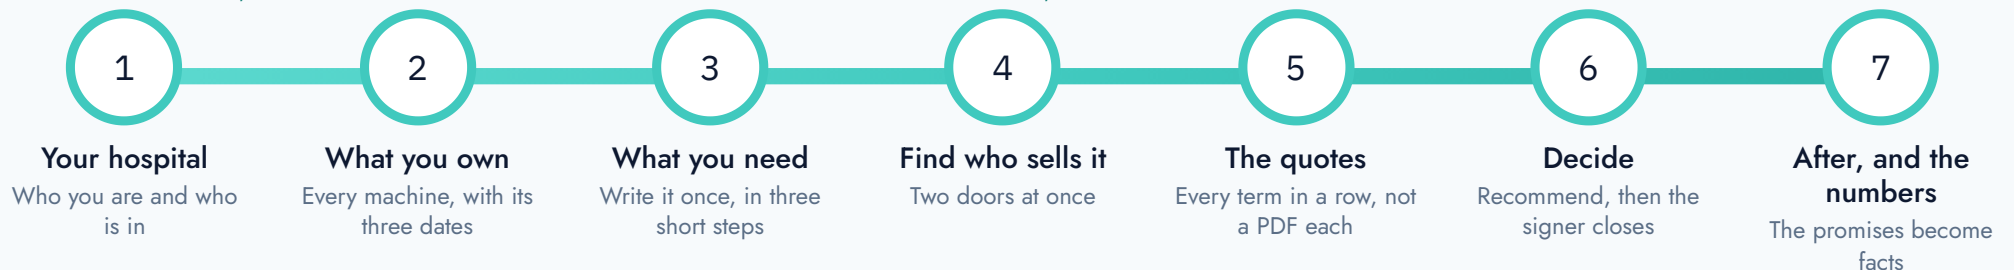

WHAT YOU APPROVE

The close. At ₹ 5 lakh and above, purchase cannot close; they recommend, and you choose the quote and close, from Home or from the requirement's Decide tab. Below ₹ 5 lakh they close themselves and you read the record.

Closing chooses one quote and tells the others. The reason you type is kept. Nothing is paid on Canipus; the sale happens between the hospital and the company.

The rule in one line. Anyone on the desk may recommend; below ₹ 5 lakh purchase or biomedical may close; at ₹ 5 lakh and above the owner doctor or the administrator closes; a visiting doctor never closes.

THE WHOLE PATH, FOR REFERENCE. PURCHASE AND BIOMEDICAL WALK IT; YOU ARE NEEDED AT 1 AND 6.

What the record gives you

THE COMPARATIVE STATEMENT

On every requirement's Decide tab: Download as a sheet, or Print the comparative statement. Every quote as the company sent it, the price printed on its record, the public rate (NPPA, CGHS, PM-JAY), and three lines: Prepared by, Recommended by, Approved by. It is the document the NABH auditor asks for, and nothing in it is estimated.

THE NUMBERS

Menu: 7 · The numbers. Requirements written, quotes received, companies that quoted, days to the first quote, assets on file, where the chosen money went. As a board would read them, with a PDF and a sheet, without asking purchase for a report.

WHAT YOU OWN, AND WHO SERVED YOU

Menu: 2 · What you own. Every machine with its warranty, AMC and calibration dates and a reminder a month before each. When a machine breaks, the hours until the engineer comes are counted against the promise on the quote, and the ninety day rating goes on the company's record that every hospital on Canipus reads.

YOUR PEOPLE

Menu: 1 · Your hospital. You or the administrator invite and remove: purchase, biomedical, doctors, up to twelve. Everyone sees the same desk. Companies see the hospital's kind and city, never a name, until someone lets one in.

THE WHOLE PATH, FOR REFERENCE. PURCHASE AND BIOMEDICAL WALK IT; THE RECORD GROWS AT 2, 6 AND 7.
